I looked up Ms. Ortons attorney and it says he concentrates his practice in commercial and residential real estate transactions.

I'm curious, if we enforce the subpoena and this ends up in front of the Judge can we show the Judge the two very different signatures we have in an "in camera" review so neither the attorney for, or Ms. Orton herself can see what the signatures in question look like.

It's more reasonable than not that showing the signatures we have would compromise our investigation into the problematic signatures. If we had to show them to Ms Orton or her counsel before we have samples of Ms Orton's signature.

I have public/limited search capabilities of electronic records with the clerk's files but I believe you have a much better search engine through the attorney portal.

Feel free to search through random cases the Popovich Firm or anyone any other firm that may have used either Urbanski Reporting or Vahl Reporting Services LTD. in the years surrounding 2013 to find Margret Ortons signature on certifications for depositions that may have been filed with the clerk.

Better yet, there may be some sort of service that can scan through several circuits records for us for a fee.

You have my permission to contract any such service to find Margret Orton's signature around 2013.

Is it possible to subpoena the reporting companies and locate the cases that they assigned Margret Orton to?

Also, perhaps it is time to get her signature from the state license's for court reporters or even her State ID or drivers license for the years we need.

Or perhaps the signature can be obtained from a bank, apartment, mortgage, auto, contract or loan documents, etc...

Thank you,
Paul
