Subject: **Dr. Kujawa**

Hi Hans and Meredith,

I had an appointment with Dr. Kujawa yesterday.
She said the Botox injections will not solve the spastic pains you saw marked on my arm in the video I sent you but it should help with opening and closing my hand so I did another round of injections.

Of coarse I asked, am I stuck with those pains the rest of my life, it's been almost 3 years?

She replied, most likely but that's what the Neurontin/Gabapentin are for and it should help curb some of those pains.

She prescribed Neurontin/Gabapentin for the pains and asked that I report any changes to her and to see her again in another 3 months.

My next appointment is set for August 14th.

Thanks again,
Paul
