Subject: **SSDI medical update**

Hi Hans and Janet,

Just thought I'd let you know the surgery on Monday went well. I'm still under heavy medication and a bit sore. The surgeon said today that he removed a bunch of scar tissue in my right forearm that bonded the muscles and skin as one. He said its all free to move separate now but the scar tissue will return. He said that getting in physical therapy quickly and with a lot of luck it should help to keep it all from bonding together again. He also had to release the ulnar nerve from compression at the elbow. It seems it bound up was under compression and formed a bit of scarring on the nerve. He did not perform the ulnar nerve transposition because he said it seemed like it would be stable enough still in the ulnar groove.

Hope that was a good explanation of what happened. I'm not all with it just yet. I should be feeling better in a few days.

Paul
