Hi Julia,

The link below is to the Illinois Forestry Association and their take on strict liability when it comes to chainsaws and felling of large trees.

Its about half way down the page.

<http://www.ilforestry.org/generalliability>

I found this and remember the defense saying something about this isn't strict liability back when gooch had the case.
If I am interpreting this correctly, According to the Illinois Forestry Association, it is Strict liability
If true, I believe this changes the contributory negligence factor in our favor

Hope this helps,
Paul
